

CLAIMS

What is claimed is:

Sub A  
SUB A  
A

1) A method for providing professional training information and compliance knowledge information to networked computers, the method comprising:  
 obtaining login data;  
 providing compliance knowledge to a one of the networked computer based on the login data;  
 providing personalized professional training information associated with the compliance knowledge to the one of the networked computer based on the login data;  
 generating compliance knowledge use data associated with use of the provided compliance knowledge; and  
 generating personal training activity data associated with use of the provided personalized professional training information.

2) The method of claim 1, wherein the generating of the personal training activity data includes generating training progress data and training performance data.

3) The method of claim 2, further comprising recording the compliance knowledge use data, training progress data and training performance data in associated with the login data.

4 /4) The method of claim 3, further comprising storing the recorded the compliance knowledge use  
5 data, training progress data and training performance data.

1 5) The method of claim 4, further comprising generating documents based on the recorded the  
2 compliance knowledge use data, training progress data and training performance data.

1 6) The method of claim 5, further comprising obtaining administrative instructions, and wherein  
2 the generating of documents includes generating the documents in accordance with the  
3 administration instructions.

1 7) The method of claim 6, further comprising storing of the generated documents in a database.

1 8) The method of claim 7, wherein the storing includes obtaining administration instruction from  
2 the administrator.

1 9) The method of claim 1, wherein the compliance knowledge includes knowledge types.

1 10) The method of claim 9, further comprising linking the knowledge types to one another.

1 11) The method of claim 9, wherein the knowledge types include a descriptive text area.

1 12) The method of claim 11, further comprising embedding in the knowledge type one of: a  
2 regulatory links, training links and a compliance link within the descriptive text area.

1 13) The method of claim 11, further comprising embedding in the personalized professional  
2 training information a communication link .

1 14) The method of claim 1, further comprising enabling communication between one or more  
2 users.

1 15) The method of claim 1, further comprising providing reference compliance knowledge based  
2 on the login data.

1 16) The method of claim 1, further comprising providing compliance management based on login  
2 data.

1 17) The method of claim 16, wherein the providing of compliance management includes assigning  
2 a profile.

1 18) The method of claim 16, wherein the providing of compliance management includes providing  
2 notification.

1 19) The method of claim 16, wherein the providing of compliance management includes creating  
2 and distributing compliance knowledge.

3  
4 20) A method of doing business for providing professional training information and compliance  
5 knowledge information to networked computers, the method of doing business comprising:  
6 obtaining login data;  
7 providing compliance knowledge to a one of the networked computer based on the login  
8 data;  
9 providing personalized professional training information associated with the compliance  
10 knowledge to the one of the networked computer based on the login data;  
11 generating compliance knowledge use data associated with use of the provided compliance  
12 knowledge; and  
13 generating personal training activity data associated with use of the provided personalized  
14 professional training information.

1 21) The method of doing business of claim 20, wherein the generating of the personal training  
2 activity data includes generating training progress data and training performance data.

1 22) The method of doing business of claim 21, further comprising recording the compliance  
2 knowledge use data, training progress data and training performance data in associated with the  
3 login data.

4

23) The method of doing business of claim 22, further comprising storing the recorded the compliance knowledge use data, training progress data and training performance data.

6

24) The method of doing business of claim 23, further comprising generating documents based on the recorded the compliance knowledge use data, training progress data and training performance data.

3

25) The method of doing business of claim 24, further comprising obtaining administrative instructions, and wherein the generating of documents includes generating the documents in accordance with the administration instructions.

3

26) The method of doing business of claim 25, further comprising storing of the generated documents in a database.

2

27) The method of doing business of claim 26, wherein the storing includes obtaining administration instruction from the administrator.

2

28) The method of doing business of claim 20, wherein the compliance knowledge includes knowledge types.

2

1 29) The method of doing business of claim 28, further comprising linking the knowledge types to  
2 one another.

1 30) The method of doing business of claim 28, wherein the knowledge types include a descriptive  
2 text area.

1 31) The method of doing business of claim 30, further comprising embedding in the knowledge  
2 type one of: a regulatory links, training links and a compliance link within the descriptive text  
3 area.

1 32) The method of doing business of claim 30, further comprising embedding in the personalized  
2 professional training information a communication link .

1 33) The method of doing business of claim 20, further comprising enabling communication  
2 between one or more users.

1 34) The method of doing business of claim 20, further comprising providing reference compliance  
2 knowledge based on the login data.

1 35) The method of doing business of claim 20, further comprising providing compliance  
2 management based on login data.

36) The method of doing business of claim 35, wherein the providing of compliance management includes assigning a profile.

37) The method of doing business of claim 35, wherein the providing of compliance management includes providing notification.

38) The method of doing business of claim 35, wherein the providing of compliance management includes creating and distributing compliance knowledge.

39) A system for providing professional training information and compliance knowledge information, the system comprising:

- a computer for providing login data;
- a network;
- a server, coupled to the computer and the network, for:
  - providing compliance knowledge to a one of the networked computer based on the login data;
  - providing personalized professional training information associated with the compliance knowledge to the one of the networked computer based on the login data;
  - generating compliance knowledge use data associated with use of the provided compliance knowledge; and
  - generating personal training activity data associated with use of the provided personalized professional training information.

41) The system of claim 40, further comprising the server for recording the compliance knowledge use data, training progress data and training performance data in associated with the login data.

43) The system of claim 42, further comprising the server for generating documents based on the recorded the compliance knowledge use data, training progress data and training performance data.

1 45) The system of claim 44, further comprising the database for storing of the generated  
2 documents.

1 46) The system of claim 45, wherein the storing includes the computer for providing  
2 administration instructions.

1 47) The system of claim 39, wherein the compliance knowledge includes knowledge types.

1 48) The system of claim 47, further comprising the server for linking the knowledge types to one  
2 another.

1 49) The system of claim 47, wherein the knowledge types include a descriptive text area.

1 50) The system of claim 49, further comprising the server for embedding in the knowledge type  
2 one of: a regulatory links, training links and a compliance link within the descriptive text area.

1 51) The system of claim 49, further comprising the server for embedding in the personalized  
2 professional training information a communication link.

1 52) The system of claim 39, further comprising the server for enabling communication between  
2 one or more users.

53) The system of claim 39, further comprising the server for providing reference compliance  
2 knowledge based on the login data.

1 54) The system of claim 39, further comprising the server for providing compliance management  
2 based on login data.

Sub C-147

1 55) The system of claim 54, wherein the providing of compliance management includes the server  
2 for assigning a profile.

1 56) The system of claim 54, wherein the providing of compliance management includes the server  
2 for providing notification.

1 57) The system of claim 54, wherein the providing of compliance management includes the server  
2 for creating and distributing compliance knowledge.
